DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a method of exposing, classified in class 430, subclass 322.
 - II. Claims 5,6, drawn to an apparatus, classified in class 355, subclass 18+
2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by a materially different apparatus such as a focused-ion-beam which can ablate the defect in the mask followed by normal exposure in an exposure apparatus.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to attorney Don Studebaker on 1/13/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1756

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
